Academic Programs

Combining rigorous, career-focused classroom instruction with practical learning experiences, academic programs at Berkeley College provide students with comprehensive preparation to enter the professional world. Degree and Certificate programs are carefully developed and regularly updated and supplemented to ensure marketplace relevance. All programs require faculty-monitored internships, practicums, or job-related assignments as part of the curriculum, allowing students to apply what they've learned and giving them valuable experience for beginning a career.

Programs have also been developed to address specific areas of student learning:

- The **Berkeley College Honors Program** is a selective interdisciplinary program that gives freshmen and continuing students the opportunity to study program-related topics in greater depth than is possible in the regular degree programs. Incoming freshmen with a high school grade point average of 3.00 or higher and demonstrated academic achievement are eligible to apply. Continuing students who have earned at least 48 but no more than 120 credits and have maintained an overall cumulative 3.50 grade point average or higher may apply for acceptance into the Honors Program.
- **Learning Communities** are cohorts of students studying, collaborating, and learning together in linked courses during an academic term, with the intent of broadening the learning experience. Learning Communities are designed to help students build rapport among their peers and their teachers, as well as offer them an integrated learning experience.
- The **Jumpstart Program** is an optional pre-college program for students who have been accepted to Berkeley, but need to develop their reading, writing, and math

skills. The program, which is available every quarter, is designed to allow high school seniors and adult students to take developmental reading, writing, and math courses, at no additional cost, in the quarter prior to their matriculation at Berkeley.
